FOR IMMEDIATE RELEASE

December 1, 2006

WARRIOR Boats, Maple Lake, MN announces four new bass boat models now in production for 2007.

WARRIOR, long known for their exceptional line of walleye boats, is introducing four models sure to turn the heads of bass fishing enthusiasts:

- 188 XRS Side Console
- 188 XRS Dual Console
- 208 XRS Side Console
- 208 XRS Dual Console

XRS stands for eX-tended Running Surface. The longer surface, than on traditional bass boat hulls, creates better stability at high speeds. It also balances the boat to make it sit level in the water at rest.

WARRIOR's experience in building dry-running hulls on their walleye boats pays big dividends in their bass boat line. The Reverse Flare Bow and a sharp reverse chine force spray out and downward for a dry ride, and allow for a tighter, controlled turning radius. A higher, 27" transom, helps keep backwash out of the boat. Plus, the higher transom means the engine sits higher to eliminate swamping of the powerhead. An 18-degree deadrise at the lower transom that transitions to 45 degrees at the deck also contributes to a smoother, drier ride.

The main cockpit and bow casting deck feature a skid-resistant, washdown floor. Plus, the spacious casting deck has a molded-in recess for the trolling motor foot control. Below the deck, huge lockable dry storage compartments hold plenty of gear. Over-sized, lighted livewells fore and aft feature WARRIOR's fresh air injection, EZ-Pump Pick-ups, and auto or manual controls that keep fish alive all day.

There is no shortage of rod storage space with port and starboard rod lockers built into the bow casting platform. The port side side rod ramp will hold five 8-foot rods with the rod tips covered by a rear storage door so they are out of harms way.

Specifications:

188 XRS, Side or Dual Console:

18' 8" LOA

95" beam

36 gallon fuel tank

Rated for up to 200 h.p.

Available now.
